

# Green House Vegetarian Bed and Breakfast

## experienceDevon

"Art, Culture and the Natural Environment are the three things dearest to our hearts and are all found in abundance in North Devon" Dave & Sadie Green

experienceDevon offers tailor-made itineraries based on the arts, culture and natural environment of North Devon; giving you independent travel with a helping hand. I run experienceDevon with my wife Sadie. this is our other work, alongside the bed and breakfast.

Experience Devon is independent travel without the risk and anxiety of 'doing it yourself'; independence with a helping hand. Our vacation planning service is customised to suit your needs as an individual and traveller, without having to book onto a group tour or have a tour guide. We put the time into planning the itinerary, through our local 'expert' knowledge, that our adventurous and independent customers do not have. The length of holiday can be anything from a few days to a number of weeks.

Our service is based on 'customer experience' as much as 'destination marketing', defining the sort of holiday the customers want in terms of the experience they are looking for. It is aimed at those who are interested in the arts and culture and the natural environment of North Devon. Eco-friendly, low carbon itineraries will encourage the use of public transport, bicycles and walking. It is for those looking for authentic experiences which provide a flavour of regional culture, traditions and history. The planned itineraries will not be possible without our help, as the emphasis will be on the hidden and less obvious places and people in the area that are known to us, through our own knowledge and contacts or sought out for the specific needs of a customer.
